Market Overview

BioMedGPS projects that the US Extremities Fixation Market reached \$238.0MM in 2021, increasing to \$311.0MM by 2026E, a CAGR of 5.5%. 2021 Showed strong recovery from the previous year's postponement of elective procedures and stay-at-home orders implemented as a result of the onset and rapid spread of COVID-19.

Note: For 2021, the total US Extremities Soft Tissue Repair Market achieved revenue of \$262.8MM, with Extremities Soft Tissue Fixation accounting for 90.6% market share at ~\$238.0MM in revenue and Extremities Soft Tissue Repair "Other" category reaching ~\$24.8MM in revenue and 9.4% share.

- US Extremity procedure volumes are expected to grow from ~468K in 2021, to ~616K by 2026E, with a CAGR of 5.6%.
- The extremity soft tissue fixation implant users are split between general orthopedic sports medicine surgeons, orthopedic foot & ankle, orthopedic upper extremity, DPMs and hand/wrist surgeons.
- From a company perspective, when a dedicated sales force is established to solely focus on extremities, then the extremities soft tissue fixation product lines do well.
- In general, however, company Sports Medicine reps carry the soft tissue extremity anchors but since DPMs and hand surgeons are outside of their call points, revenue for the extremities soft tissue fixation product lines suffer.
- Additionally, many companies are simply taking their shoulder anchors and trying to make them smaller. With the issues of limited space and depth of drilling in small joints, simply making the anchors smaller does not seem to completely address the issue.
- Of the projected Extremities procedures for 2021, approximately 30% or ~146K procedures will be performed for Upper Extremities (hand/wrist/elbow), increasing to ~197K by 2026E, a CAGR of 6.3%.

Company Overview

Anika Therapeutics, a public Company founded in 1992, develops, manufactures and commercializes therapeutic products for tissue protection, healing and repair. The Company's product portfolio includes technologies based on its proprietary, chemically modified hyaluronic acid polymer that is used for orthobiologics, dermatology, ophthalmic surgery and wound management. Anika Therapeutics' flagship products are MONOVISC and ORTHOVISC, injectable formulations of hyaluronic acid for treating knee osteoarthritis. Anika operates in a single segment w/4 product groups: Orthobiologics, Surgical, Dermal and Other.

On Feb 3, 2020, Anika **announced** the completion of the acquisition of Arthrosurface. Under the terms of the agreement, Anika acquired [Arthrosurface](#) and its joint preservation technologies for an upfront payment of \$60.0MM in cash.

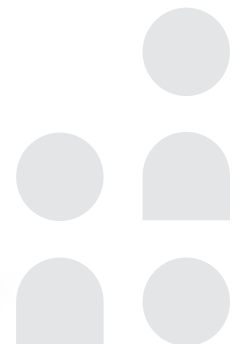

On Jan 24, 2020, Anika **announced** it closed the acquisition of [Parcus Medical](#). This acquisition is expected to help achieve the objectives of Anika's 5-yr strategic plan. Next is executing the integration plan as Anika moves toward becoming a global leader in sports and regenerative medicine. Under the terms of the agreement, Anika acquired all outstanding membership interests in exchange for an upfront payment of ~\$35.0MM in cash. Also, Parcus Medical unitholders will receive an additional \$60.0MM contingent upon successful achievement of certain commercial milestones. The [Parcus Medical](#) executive team, led by President Mark Brunsvold, joins Anika to lead the Parcus Medical business.

Funding

In Q119, Anika **announced** a \$50.0MM Share Repurchasing Program to include \$30.0MM accelerated share repurchase and up to an additional \$20.0MM of common stock purchased on the open market. The Company expects the program to start mid-May and complete no later than Q220.

Revenues & Financial Outlook

For Q222, Anika **reported** product revenue of \$39.7MM, +4.0% vs Q221, with Joint Pain Mgmt revenue

Product Profiles

SmartTRAK's Product Profiles offer the most relevant, up-to-date information you need. We cover over 7,300 products.

The screenshot displays the SmartTRAK website's 'Products' page. The top navigation bar includes 'NEWS' (Home, Analysis), 'RESEARCH' (Markets, Companies, Products), 'TOOLS' (Product Explorer, Gap Analysis, Financial Dashboard, Clinician Panel), and 'MY TRAK'. A search bar and utility buttons for 'Direct Access', 'Help', and 'My TRAK' are also present. The main content area shows a list of products with 7317 results. Product Description

The 2.4mm LCP Distal Radius System, for fracture fixation and osteotomies of the distal radius, consists of stainless steel and titanium low profile plates and screws. The plates feature rounded edges, Combi-holes allowing surgeons the option of using conventional plating techniques, locked plating techniques or a combination of both. Screws for the system include 2.4mm self-tapping locking and non-locking screws, 2.7mm self-tapping cortex screws and 1.8mm LCP Buttress pins. Included in the system are:

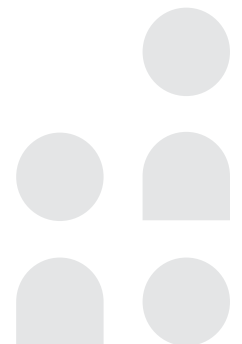

- Volar Column Distal Radius Plates - precontoured to anatomically match the volar aspect these plates feature multiple locking screw holes in the head including 2 screws angled to capture the radial styloid to prevent fragment rotation. Available in L/R configurations with 6, 7, 8 or 9 holes in the head and 3 to 5 holes in the shaft in lengths from 45 to 68.5mm.
- Extra-Articular Plates - precontoured to anatomically match the volar aspect the plate placement is away from the articular surface. Plates feature undercuts on the bottom of the 5 hole head. Available in L/R configurations with 4 or 5 holes in the head and 3 to 5 holes in the shaft in lengths from 48 to 65mm.
- Juxta-Articular Volar Plates - precontoured with a complex bend to fit the volar surface with the ability to place the plate as distal as possible on the radius. Plates feature undercuts on the bottom of the plate. Available in L/R configurations with 5 holes in the head and 3 or 5 holes in the shaft in lengths from 43 to 61mm.
- Dorsal Plates - Includes right angle L-Plates (R/L configurations with either 2 or 3 holes in the head and 3 or 4 holes in the shaft), oblique L-Plates (R/L configurations with 3 holes in the head and 3 or 4 holes in the shaft), T-Plates (3 or 4 holes in shaft) and Straight Plates (5 or 6 holes) designed for use in the dorsal 2-plate technique. The straight plates have a notched tip allowing plates to fit on the radial styloid.

Indication

For use in fixation of complex intra- and extra- articular fractures and osteotomies of the distal radius and other small bones

Clinical Update

On the left-hand side of the page, important product information and quick links to the product pages are displayed.

Product Explorer

Do you want to see the global competitive landscape of a market segment? Be sure to check all boxes under Product Details. This will allow you to drill down further.

Product Explorer: Select Scenario

Gap Analysis

Looking for acquisition candidates or looking to fill a gap in your product portfolio? Gap Analysis lets you do this in seconds. Click here for a further detailed overview on how to use Gap Analysis.

The screenshot displays the SmartTRAK Gap Analysis interface. At the top, there is a navigation bar with sections for NEWS, RESEARCH, TOOLS, and MY TRAK. The RESEARCH section is active, showing sub-menus for Home, Analysis, Markets, Companies, and Products. The TOOLS section includes Product Explorer, Gap Analysis (highlighted), Financial Dashboard, and Clinician Panel. The MY TRAK section contains a star icon and a refresh icon. A search bar and buttons for Direct Access, Help, and My TRAK are also present.

The main content area is titled "Gap Analysis" with a link to "How do I use Gap Analysis?". Below this, there is a "Select Scenario" dropdown and a "Save Scenario" button. The filter section shows "Extremities, OrthoBio" and "Foot & Ankle, Upper ..." selected, with radio buttons for "by Company" (selected) and "by Portfolio", and a "Clear all filters" link.

Selected Markets: Extremities, OrthoBio
 Selected Segments: Upper Extremities, Foot & Ankle, Cartilage, Soft Tissue Replacement

The main data area is a grid with columns for product categories and status. The categories are:

- Upper Extremities: Elbow Replacement, Finger Replacement, Wrist Replacement, Shoulder Replacement, Upper Extremities Fixation.
- Foot & Ankle: Ankle Replacement, Foot & Ankle Fixation.

 The status legend indicates: Available (US, TRAK), Development (US, TRAK), Discontinued (US, TRAK), and Gap (US, TRAK). The grid lists companies like 3S Ortho, 41hemiverse, 7S Medical, Aap Implantate, Acumed, Aesculap, and Alafair Biosciences, with colored cells indicating their product status in each category.

Gap Analysis

You can view by Company or Portfolio.
Company sorts alphabetically. Portfolio sorts companies with the best coverage to the top.

Gap Analysis

Click the left side of the green pill to see what product is on the market in the US.
 Click the right side of the green pill for OUS.

Gap Analysis

You can also download this information.

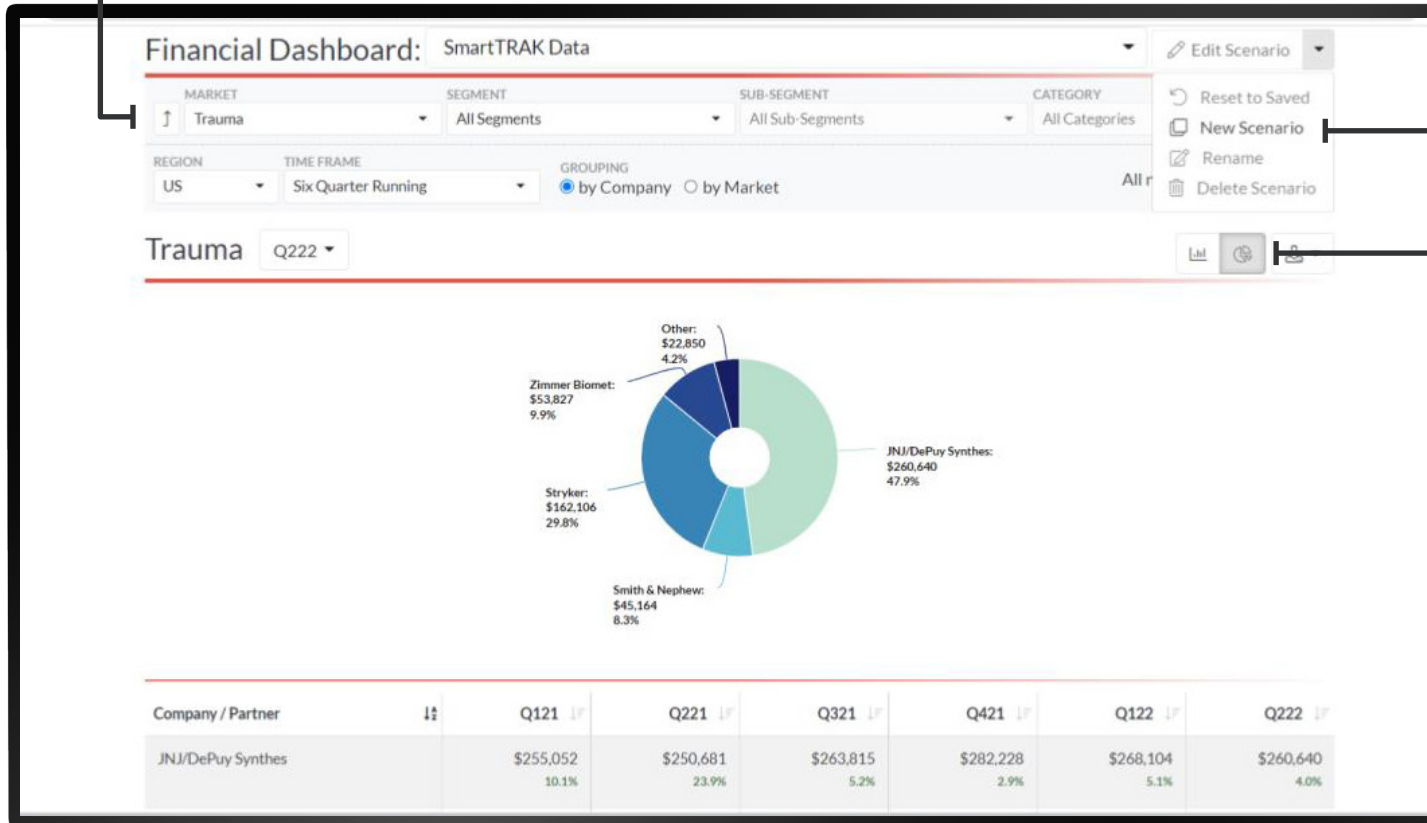

You can anchor a company to the top by clicking the arrow next to their name.

If this is a search you will be performing often, click new scenario, name the scenario, and click save.

Financial Dashboard

Looking to determine quarterly revenues and competitive shares for your market or segment? You can view "by company" or "by market."

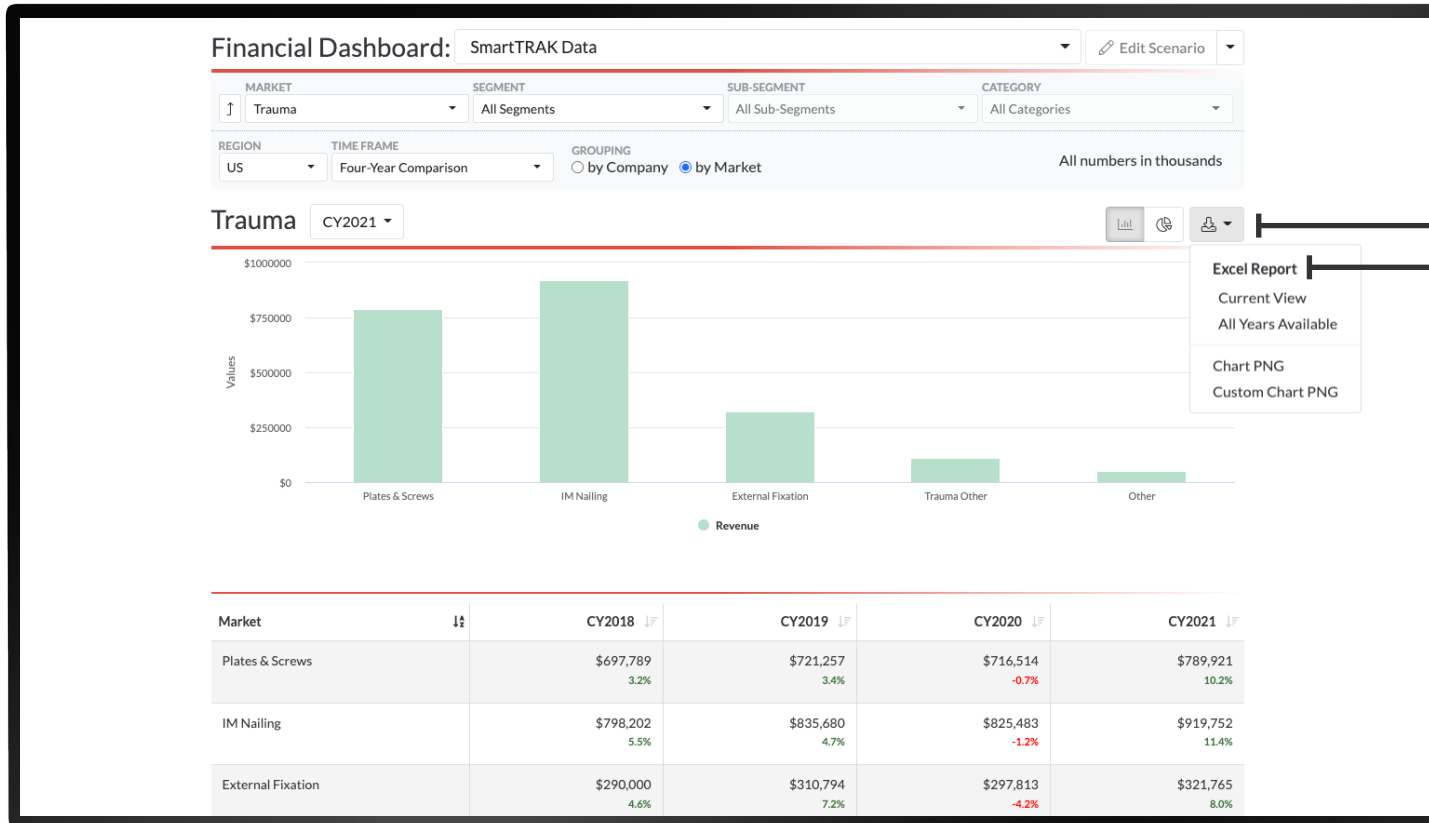

If this is a search you will be performing often, click new scenario, name the scenario, and click save.

You can view the graph as a pie chart or bar graph.

Financial Dashboard

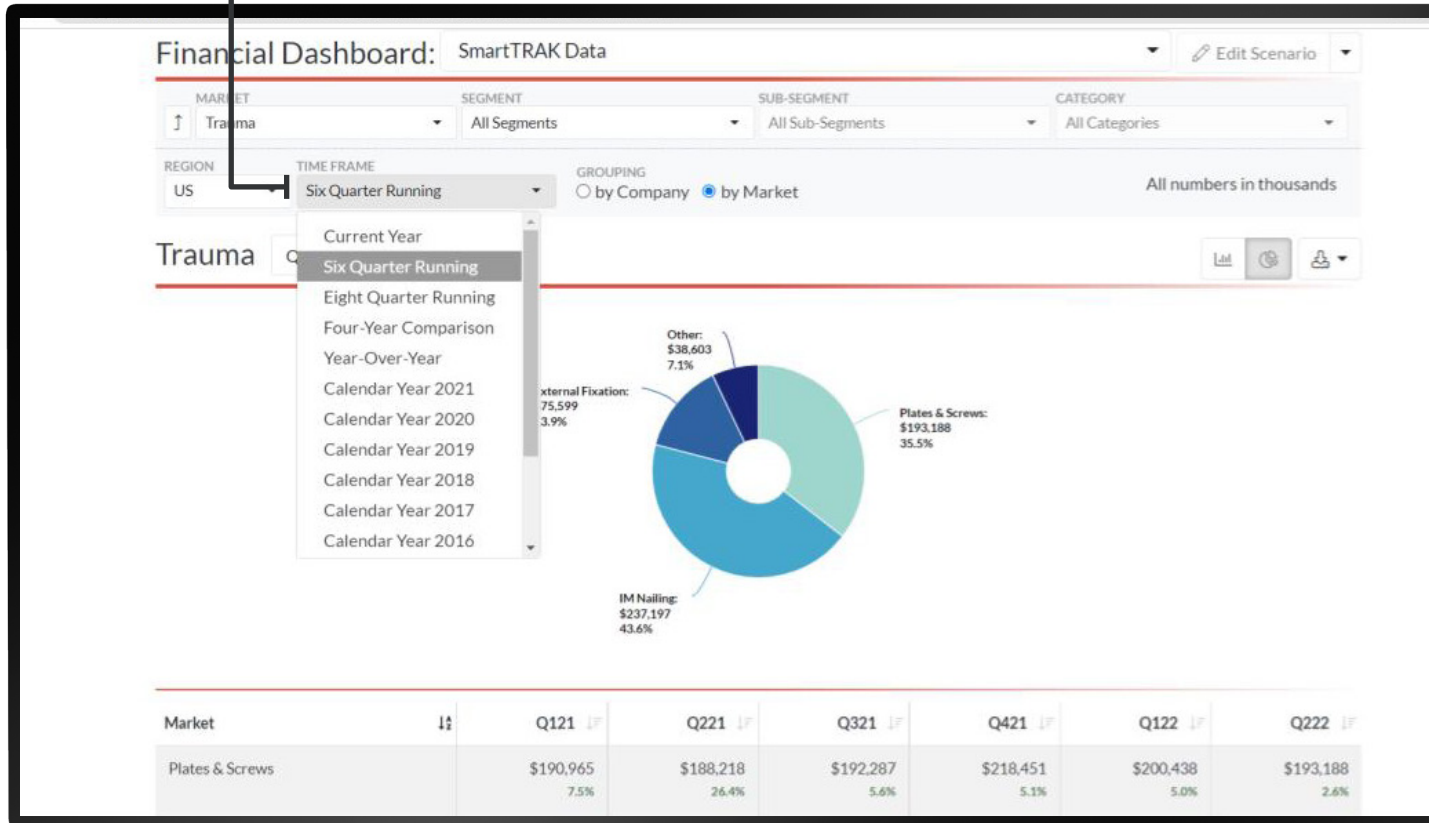

You can also download this information.

You can download the charts as well as the data into Excel format.

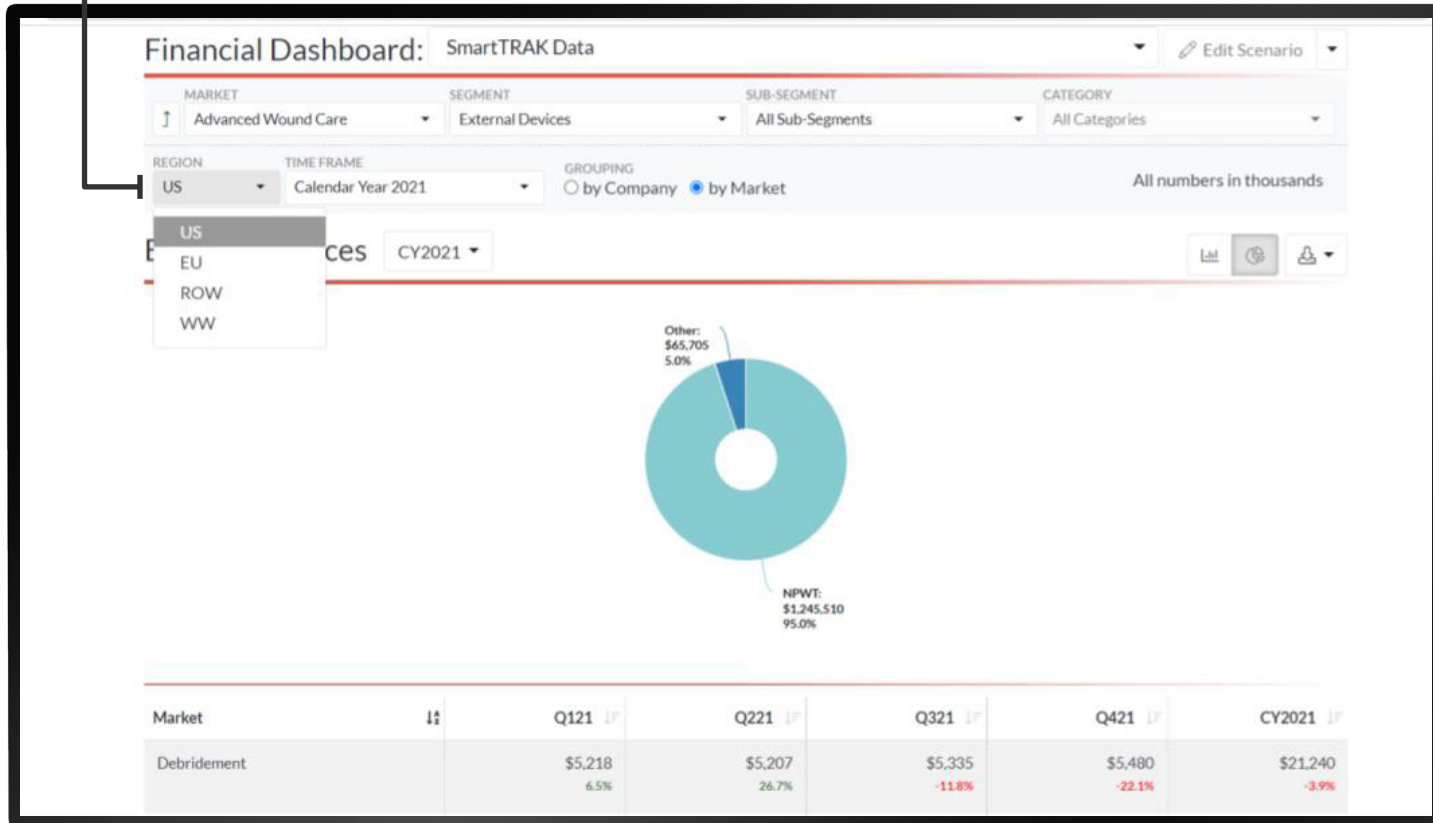

Financial Dashboard

You can adjust the time period to fit your needs.

Financial Dashboard

You can select region. Please Note: Not all Markets cover Outside US.

The screenshot displays the SmartTRAK website interface. At the top left is the SmartTRAK logo. To its right is a search bar and navigation links for 'Direct Access', 'Help', and 'My TRAK'. Below this is a horizontal menu with categories: NEWS (Home, Analysis), RESEARCH (Markets, Companies, Products), TOOLS (Product Explorer, Gap Analysis, Financial Dashboard, Clinician Panel), and MY TRAK (with a star icon and a user profile icon). The user profile icon is open, showing a dropdown menu with the user's name 'TRACEY CLARKE' and email 'tracey.clarke@smarttrak.com'. The menu options are 'Account Settings', 'Team Settings', and 'Sign Out'. A black arrow points from the 'Account Settings' option to the text in the top right corner. The main content area features a 'Featured Analysis' section with four articles: 'OrthoBio-Focused Themes Emerging from NASS 2022' by James Petricek, 'Digital Solutions in the Wound Care Arena' by Aniko Szeker, 'Currency Movements Overshadow Underlying Business Growth in 2022' by Lennart Stadler, and 'Astura Medical Reveals New Products Launching at NASS 2022' by Courtney Sheedy. Below this is a 'SmartTRAK Updates' section with a 'Filter...' input field and dropdown menus for 'All Markets', 'All Segments', 'All Types', and 'Regions'. A 'PATENTS' section is partially visible at the bottom left, mentioning 'Medtronic' and 'Covidien's US Patent Application "MULTI-PIVOT THROMBECTOMY DEVICE"'. On the right side of the updates section, there are 'Market Recaps' for 'Q222 Spine Market Recap' and 'Q222 CAS Ortho Market Recap'.
